

COVID-19 Guidance for Re-opening Places of Worship

September 2020

Faith communities have continued their work throughout the COVID-19 pandemic, with the exception of in-person gatherings at their place of worship since these were prohibited by provincial order, as part of an unprecedented effort to contain the spread of the virus.

In-person gatherings for prayer and worship are now permitted with the certain conditions, as described in this guidance document. Faith community leaders should carefully consider how and when to re-establish face-to-face activities. Some faith communities may have many members who are older and/or have chronic medical conditions, and it is strongly recommended that provisions be made to enable them to participate in a safe manner. You may wish to continue with online services, either on their own, or in addition to in-person services.

This guidance reflects the current need for protection from COVID-19 in the Porcupine Health Unit's area. As the spread of infection is brought under further control, revised guidance will be issued. Many faith communities operate drop-ins, lunch programs or other services for people who are homeless or other vulnerable people. Specific guidance is being prepared for these programs. Checklists for specific faith community rituals and practices will also be available in the coming days. However, the general guidance below will still be required.

All places of worship **must** adhere to the following requirements:

- Mandatory mask/face covering use. The use of a face covering does not replace the need for other public health measures such as physical distancing, frequent hand hygiene, and staying home if unwell.
- Participation of no more than 30% of the capacity of your premises.
- Maintaining a distance of two metres/six feet between all persons as much as possible.
- Limiting singing and loud speaking.
- Avoiding opportunities for the virus to spread through touch, either directly or indirectly through surfaces and objects, including objects that may be used in rituals or ceremonies.
- Enhanced cleaning and disinfection.

Faith community leaders /organizers are responsible for preventing the risk of infection among staff, volunteers, community members, and visitors who participate in their activities.

Preparation

- Consider alternative ways to involve individuals at greater risk from COVID-19, including online services.
- Plan how to ensure physical distancing by calculating 30% of the capacity of the available space. This is the maximum number of participants allowed. The reduced capacity number includes all participants except children under two years of age.
- Remove seating, or if seating is fixed, mark it unavailable or rope it off to ensure a two metre/six foot distance between rows of seating. Plan the quantity of seating to allow for a two metre/six foot distance between individuals or household groups along each row. If the reducing seating capacity will be less than the expected attendance, consider re-arranging the schedule of services to provide more, but smaller, services.
- Plan how to control movement into and out of your facility, and within the space to ensure a two metre/six foot distance. Separate entrances and exits may not be necessary as participants usually enter and exit within distinct time periods.
- Discourage movement against the flow of people moving in the space. It may be necessary to mark off two metre/six foot distances outside and/or in a vestibule if it is anticipated that lines will form. Consider having someone control leaving the space by seating row.
- Consider developing a system to RSVP attendance to specific services or events. This may also allow online screening of attendees at the same time.
- Ensure all water systems (drinking fountains) are safe to use after the prolonged facility shutdown to minimize risk of diseases associated with water. If drinking fountains are available, ensure they are used safely and cleaned and disinfected daily. Discontinue use of holy water stoup.
- Develop a schedule for increased routine cleaning and disinfecting.

Prevent COVID-19 Outbreaks

- Ensure you have a way to contact attendees in the event that someone has attended your place of worship while contagious.
- Options include keeping a record of online RSVPs, having someone observe and record names, having members sign in through a safe method (do not provide a pen that can be passed between people), or providing a list of members upon request.
- If there is a case of COVID-19 who was contagious while attending services, public health will use that list to notify the place of worship attendees and staff. This may include instructions for to self-isolate or self-monitor for COVID-19 symptoms.
- Anyone with even one symptom of COVID-19 should get tested and stay home.
- Public health will advise of any additional cleaning and disinfecting measures needed to reduce the risk of spread in the setting.

Establish Policies for Health Screening

Staff and volunteers must report illness immediately to their manager, and stay home if they are sick. Staff and volunteers must be screened each time before starting their duties. Persons who become ill while in the service must go home right away and self-isolate. They can call Telehealth, their health care provider or an assessment centre for guidance about testing.

Training

Staff, volunteers should use a mask/face covering at all times while providing services. Instruct staff and volunteers on proper hand hygiene techniques and respiratory etiquette; when to use masks, proper use of mask, and how to clean or discard single use masks appropriately.

Print and Post Signs

- COVID-19 health assessment sign should be posted at all entrances.
- COVID-19 mandatory face covering/mask sign should be posted at all entrances. Signs can be found under businesses section in the Porcupine Health Unit website.
- Anyone with COVID-19 symptoms, or who has been in contact with someone with COVID-19 is not permitted to enter.
- Handwashing and respiratory etiquette signs should be posted in high visibility areas.

Add similar information to the organization's website. Encourage attendees to use the online self-assessment tool before every visit to the place of worship and/or set up screening station away from the entrance to avoid crowding.

During Services

- Remind everyone that a face covering is required while inside the premises. Exemptions include people who cannot wear a mask or face covering for medical reasons, or children under two years old, or those who require accommodation in accordance with the Ontario Human Rights Code. **Proof of exemption is not required.**
- Remind everyone not to attend the service in person if they are experiencing symptoms of COVID-19.
- Modify the activities before and during the service to ensure a 2m distance between leaders, staff, volunteers and attendees at all times.
- Activities that increase the risk of COVID-19 transmission should be altered or discontinued.
- Respiratory droplets and aerosols generated during singing, loud speech or use of wind instruments may travel further than 2m. The following practices are recommended:
 - Consider using audio or video recordings instead of live singing or wind or brass instrumental music.
 - Group singing is strongly discouraged. However, if more than one person is singing, limit the number of people singing to the fewest possible.
 - Anyone singing or playing wind or brass instruments should be 2 metres from anyone else and separated by an impermeable barrier. If an impermeable barrier is not used, anyone singing or playing wind or brass instruments should be separated from any other person (outside of the same household or social circle) to the greatest extent possible (but at least 2 metres).
- Sharing or distributing materials or objects, which may include but is not limited to, books, communion, microphones, prayer mats, prayer shawls, water, etc. If any materials or objects are shared or distributed:
 - Ensure that hand hygiene is performed prior to distribution or sharing;

- Consider leaving objects or materials to be distributed on a table for individuals to pick up; and/or
- Limit the number of individuals who have contact with materials or objects. Ensure any materials or objects that are returned or accessed within the setting are disinfected or not re-used immediately.
- Regular childcare and children's programming: Any childcare and children's programming should operate in a manner generally consistent with the Ministry of Health's [COVID Guidance: Summer Day Camps](#).
- Avoid any physical contact. Encourage people to greet each other with a smile, bow or wave (e.g. during exchange of the Peace).
- Allow for adequate cleaning and disinfecting of prayer and high traffic areas between services.
- Avoid use of items that are difficult to clean, sanitize or disinfect.
- Rituals involving close physical contact (e.g. baptism) or shared items (e.g. receptacles, washing facilities) are strongly discouraged at this time. If they must be performed, considerations need to be made to provide them safely such as use of appropriate personal protective equipment.
- Discontinuing communion is strongly recommended at this time. Discontinue use of holy water rites.
- Do not pass offering plates. Consider a designed area to offer donations or use of online/e-transfer or debit/credit card tap machines.
- Encourage hand hygiene and respiratory etiquette with hand sanitizer stations (60% alcohol concentration). Avoid access to hand sanitizer by young children without supervision.
- Encourage good respiratory etiquette. Cover mouth and nose with elbow when coughing or sneezing or use a tissue then discard tissue in waste bin. Wash or sanitize hands after.
- Social gatherings before or after in-person services, including those where food and drink are shared: If held, social gatherings are subject to public gathering limits, and physical distancing is required.

Enhanced Cleaning and Disinfection

- Disinfectant kills germs on surfaces. Remove surface dirt first in order for the disinfectant to work.
- Most regular household cleaning products are effective at eliminating the virus.
- Cleaning and disinfectant products should have an 8-digit Drug Identification Number (DIN) to confirm it is approved for use in Canada. Check the expiry dates of products and always follow the manufacturer's instructions. Keep products away from children.
- Cleaning/disinfection wipes should only be used for surfaces, and according to the manufacturer's instructions. Alternatively, chlorine bleach solutions may be used for disinfection.
- Educate staff on proper use of cleaning agents and disinfectants, including required disinfectant contact times (amount of time that the product will need to remain wet on a surface to achieve disinfection). Understand [safety precautions](#) and requirement for use of mask and gloves.
- Ensure adequate ventilation when using products (e.g. open windows, doors, or use fans).
- Ensure ventilation systems are operating properly, and replace filters as scheduled or sooner.
- [Clean and disinfect](#) all high-touch surfaces (e.g. toilets, sinks, door handles, light switches, remote controls) twice a day or more, and when visibly dirty.
- Ensure washrooms are always stocked with liquid soap and paper towel. Antibacterial soap is not required to prevent the spread of COVID-19.
- Wash hands with soap and water immediately after cleaning.

Note: Disinfectant wipes may have a combined cleaning and disinfectant in one solution, but depending on how dirty the surface is, it may need to be pre-cleaned as disinfectants may become ineffective when dirt is present. Check instructions on the product's label.

Drive-in Religious Gatherings

- Only members of the same household can be in one vehicle.
- Discourage people from leaving their vehicles during the service, except when using the washroom.
- Vehicles must be parked two metres/six feet apart or more. Discourage the idling of engines.
- No more than five people can conduct the service at one time from outside a vehicle, and they must stay at least two metres/six feet apart from each other.
- If faith community leaders, staff or volunteers are to approach a vehicle to provide service to its occupants, everyone is encouraged to wear a mask.

Weddings and Funerals

Wedding and funeral ceremonies taking place outdoors will be limited to 100 attendees. The maximum number of people allowed to attend indoor or wedding and funeral receptions is 50 people. For both indoor and outdoor ceremonies, those attending must follow proper health and safety advice, including practicing physical distancing from people who are not from the same household or their established 10-person social circle.

People gathering indoors for religious services, rites or ceremonies, and wedding ceremonies or funeral services, can continue to fill up to 30 per cent of the capacity of the particular room.

Other Businesses on Premises

Places of worship that offer free or rented spaces to other groups or businesses must abide by the emergency orders of the provincial Chief Medical Officer of Health, and all applicable public health guidance documents.
